### DETAILED ACTION

This Office action is in response to the reconsideration received March 18, 2003.

#### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-21 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by CUNNINGHAM et al '863.

The claimed invention is drawn to a photopolymerizable composition comprising a polymerizable compound having an addition polymerizable unsaturated bond, an organic dye and a least one kind of an organoboron compound of General Formula (I).

CUNNINGHAM et al '863 anticipates the claimed invention at Example 36 wherein a polymerizable compound, an organic dye, and a borate compound as recited in the formula of claim 1.

The arguments by applicant have been carefully considered, however the language of the claim is clearly met by the examples for the phrase "at least one mole per mole of the organic dye". Clearly the amount of the borate compound being 0.4% in the composition with 0.3% of a cyanine dye meets the language as claimed. Further whether the prior art appreciates specific molar ratios in their composition is irrelevant to the claimed invention. In fact if the ratio is taught in the prior art the skilled artisan would reasonably expect same or similar properties in

Art Unit: 1752

the composition of the prior art because the compounds and their properties are inseparable.

Thus the rejection is repeated and no claim is allowed.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
